

IS COMPOSTING THE RIGHT APPROACH FOR YOUR WASTE MANAGEMENT NEEDS?

RENT SCS'S COVERED AERATED STATIC PILE (ASP) COMPOST SYSTEM AND CONDUCT A TEST

We can help you evaluate your organic waste streams and whether composting is a viable solution before you make a capital investment.

The organic fraction of your waste stream can be composted successfully. A pilot test allows you to assess composting of materials such as food scraps, yard trimmings, food processing by-products, and biosolids.

We can provide the following services:

- ASP compost system setup and operation
- Compost up to 40-50 tons of material per batch
- 2 month cycle per batch
- Test report with process and lab data
- Consulting services

Benefits:

- Low cost opportunity to test composting feasibility
- Ability to test different mixes
- Assess the quality of the finished compost
- Assess odor control and process control
- Test footprint is 5000 sqft or less on your site
