

KEVIN ALAN JENSEN

Education

BS – Environmental Science, Iowa State University, 2011

Professional Experience

As a Senior Project Professional, Kevin Jensen is responsible for maintaining client relations and providing environmental services to industrial facilities and landfills. He conducts solid waste, air, wastewater, and other environmental monitoring and reporting projects largely for private, industrial clients.

Projects typically involve landfill groundwater reporting, environmental permitting, pollution prevention planning, and facility inspection services. Facilities include industrial landfills, various manufacturing and processing companies, service and construction companies, and municipal landfills and transfer stations. Additional experience includes compost facility permitting, compliance audits, and compliance and certification training.

Kevin has authored numerous Annual Water Quality Reports, Spill Prevention, Control, and Countermeasures Plans, and Storm Water Pollution Prevention Plans. He has participated in EPA Superfund Site reviews and prepared the Quality Assurance Project Plans. Project sites include agriculture and metals processing plants, limestone and gypsum mining and processing plants, fuel storage facilities, active and closed landfills, and superfund sites.

Project Experience

Climax Molybdenum Company, Iowa - Monofill and Facility Compliance Services. Client services manager responsible for directing groundwater sampling activities for the monofill and the facility groundwater monitoring system. Kevin is also responsible for management of the leachate collection system and SCADA monitoring system and for inspections of the monofill and surface impoundments at the facility.

Heidelberg Superfund Site, Iowa - Groundwater and Remedial System Reporting. Client services manager responsible for directing groundwater sampling activities and reporting on the groundwater quality at the site and the operation and maintenance of the institutional controls and remedial systems.

Republic Services, Iowa/Illinois - Environmental Plans, Training, and Inspection Management. Project manager responsible for updating the environmental plans associated with Republic Services facilities in the states of Iowa and Illinois. Kevin is also responsible for performance and recordkeeping of the environmental inspections and annual refresher trainings.

CertainTeed Gypsum, Iowa - Environmental Permitting of Pleasant Valley Mine. Client services manager responsible for permitting of the wastewater storage pond and effluent discharge. Project permitting included antidegradation and alternatives analysis, wastewater storage facility design, and combined wastewater and stormwater discharge permitting.

Appliance Demanufacturing Certification Training - State of Iowa. Lead instructor of the individual certification program for appliance demanufacturing operations in the state of Iowa.
