

ALAN MOREIRA

Education

B.A.Sc. - Chemical Engineering, University of Waterloo, 1986

Professional Experience

Mr. Moreira is a Senior Project Manager with SCS Energy. Since joining SCS Energy in 2023, he has managed the execution of a major engineer/procure/construct (EPC) renewable natural gas (RNG) project.

Ocean RNG, LLC, Design/Build of an RNG Facility, Manchester, NJ

Design/build of a 6,000 scfm landfill gas to RNG plant employing non-regenerative media for hydrogen sulfide removal, membranes for carbon dioxide removal, pressure swing adsorption for nitrogen removal, a thermal oxidizer, and tie-in to a natural gas pipeline for RNG offload.

Before joining SCS Energy, Mr. Moreira had over 10 years of project management and 15 years of process engineering experience in oil and gas, specialty gas, and utility gas industries. His accountabilities included front end project development, scheduling & project controls, supply chain management, process and construction safety and quality control, engineering and value management, and construction management. He provided leadership of design teams and development of staff.

Mr. Moreira resides in Bay Shore, New York, where he works remotely from SCS Energy's main office in Long Beach, California.
