## Professional Experience

As a Project Director, Don Barfield is responsible for supporting SCS environmental services in Northeast Florida and Southeast Georgia, which include client procurement and development, sales and profitability, technical oversight and management, supporting field staff, and project development and review.

Mr. Barfield has worked on a multitude of projects throughout his career including Phase I Environmental Site Assessments (ESAs), Phase II ESAs, due diligence and risk review for large acquisitions, closure plans for RCRA facilities, UST/AST closures, brownfield assessments, cattle dip vat assessment and remedial design, and large-scale remediation projects.

Notable projects that Mr. Barfield has been involved in are described below.

### **Brownfield Assessments**

**Green Cove Springs, Florida, Brownfield Area-Wide Assessment.** Project Manager responsible for coordinating and managing brownfield assessments for the City of Green Cove Springs. Responsibilities also included procurement of additional funds to support future assessment and remedial work for the Green Cove Springs Brownfield Area.

**Lofts at LaVilla, Jacksonville, Brownfield Site Rehabilitation Agreement.** Project Manager responsible for environmental assessment and remedial activities for an affordable housing project referred to as Lofts at LaVilla. Additional responsibilities included working with the client and their legal team on preparing a Brownfield Site Rehabilitation Agreement (BSRA) for the project area and securing tax credits for the project through the Voluntary Cleanup Tax Credit.

### **Due Diligence Assessments and Risk Reviews**

**Multinational chemical company due diligence assessment and risk review.** Project Director responsible for direction and oversight of due diligence assessments and risk reviews for twenty-four chemical warehouses located throughout the U.S., South Korea, and Israel for multi-billion-dollar asset management company.

**Phase I & II ESAs**

**30,000-Acre Timber Tract, Woodbine, Georgia, Phase I & II ESAs.** Project Manager responsible for direction and oversight of a Phase I ESA and Phase II ESA for an approximate 30,000-Acre timber tract located in Woodbine, Georgia.

**Front Street, Fernandina Beach, Florida, Phase II ESA.** Project Manager responsible for direction and oversight of a multi-phase Phase II ESA for an active oil distribution facility and former wood treatment facility located in Fernandina Beach, Florida.

**Immokalee Cattle Dip Vat, Immokalee, Florida, Phase II ESA.** Project Director responsible for direction and oversight of a multi-phase Phase II ESA for a former cattle dip vat located in Immokalee, Florida.

**RCRA Site Assessment and Closure Plan**

**Batch Acid Production Facility, Savannah, Georgia, RCRA Assessment and Closure Plan.** Project Director responsible for site assessment and preparation of closure plans for several designated RCRA sites at a batch acid production facility in Savannah, Georgia.
