

Virtual Seminar - LIVE

18th LANDFILL & SOLID WASTE ANNUAL MARYLAND SEMINAR

This half-day seminar is designed to provide updates on the latest regulatory, policy, and technological developments in solid waste, landfill and landfill gas industries.

The seminar is intended for solid waste management professionals, landfill managers, waste/recycling managers, supervisors, and operators. For attendees already possessing landfill experience, topics will provide a fresh perspective and cover important regulatory and technological updates. For those new to the field, topics will cover essential information on all aspects of landfill development, operations, monitoring, and management.

Free, live seminar - open to solid waste professionals.
