

MICHAEL SOLOMON, P.E.

Education

B.S. - Mechanical Engineering, Ohio University, 2004

Professional Licenses

Professional Engineer - Colorado (No. 44992)

Professional Experience

Mr. Solomon is a Senior Project Manager with SCS Energy. He has experience managing the EPC execution of renewable natural gas (RNG) projects. Example projects include:

Emerald RNG, LLC, Design/Build of a Landfill Gas Treatment Facility, Northville, MI.

Design/build of a 10,000 scfm landfill gas to RNG plant employing membranes for carbon dioxide removal, pressure swing adsorption for nitrogen removal, and a deoxo/dryer for advanced oxygen removal.

Sapphire RNG, LLC, Design/Build of a Landfill Gas Treatment Facility, Roseboro, NC

Design/build of a 6,000 scfm landfill gas to RNG plant employing membranes for carbon dioxide removal and pressure swing adsorption for nitrogen removal, and a virtual pipeline for RNG offload.

Before joining SCS Energy, Mr. Solomon was employed by Noble Midstream Partners and AECOM as a Project Manager and Supervising Engineer for several industries including oil and gas, chemical, power and government. His responsibilities included project commercial and technical management, project scoping, scheduling, procurement, safety and quality conformance, engineering coordination and construction oversight. He provided leadership of design teams and development of staff.
